perum taman walet blok si 1 no 26, Kelurahan Sindangsari , kecamatan Pasar Kemis, Kabupaten Tangerang, Banten

Fresh graduate dengan minat tinggi di bidang teknologi, khususnya web development dan AI automation. Telah mengikuti pelatihan Fullstack Website dari KelasFullstack RevoU, JavaScript dan Next.js dari Kesatria Academy, WebGIS dari Geosoftware, dan WebGIS 3D dari Gim E-Learning, serta pengalaman internship sebagai Website Developer di Wiratek, perusahaan konsultan IT & AI.

Work Experiences

Wiratek Solusi Asia - **Purwokerto, Indonesia** Jun 2026 - Present

Internship

PT Wiratek Solusi Asia is an IT consulting company based in South Jakarta, Indonesia, specializing in software development, AI implementation, and blockchain solutions, while also running IT bootcamps and training programs.

- Developed and maintained an LMS (Learning Management System) platform, kesatria.wiratek.id, as a Fullstack Developer using NestJS, PostgreSQL, Handlebars, and JavaScript
- Built and maintained both frontend and backend features to support the platform's core learning functionalities
- Collaborated with the development team to design database schemas and RESTful APIs using NestJS and PostgreSQL
- Implemented server-side rendered views using Handlebars for dynamic and responsive user interfaces

Pendidikan

Universitas Jenderal Soedirman - **Purwokerto, Indonesia** Aug 2022 - Aug 2026

Bachelor of Marine Science, 3.38/4.00

- Achieved 3rd Place in the Unsoed Rector's Cup 2024 – Futsal Category

Pengalaman Organisasi

Student Executive Board (BEM) - **Purwokerto** Mar 2023 - Dec 2023

Staff of the Ministry of Student Resource Development

Served as a Staff Member of the Ministry of Student Resource Development, Student Executive Board (BEM), responsible for organizing PKKMB (New Student Orientation Program) 2024. Involved in planning and executing orientation activities to help new students adapt to campus life, understand organizational structure, and develop their potential from the beginning of their academic journey.

- Led the "Upgrading Internal BEM FPIK Unsoed" program to strengthen members' capacity and teamwork within the organization
- Served as Event Division Staff for PKKMB (New Student Orientation) 2023, responsible for planning and executing orientation activities for new students

Kemampuan, Penghargaan, dan Kompetisi

- **Projects** (2025): Company Profile Website - PT Bisofer Saintek. Merancang dan mengembangkan website profil perusahaan yang profesional dan responsif untuk PT Bisofer Saintek menggunakan CMS WordPress. Melakukan kustomisasi tema (theme customization) agar sesuai dengan identitas brand perusahaan, serta mengonfigurasi plugin esensial untuk keamanan, optimasi kecepatan, dan SEO dasar. Website ini bertujuan untuk meningkatkan kredibilitas dan kehadiran digital perusahaan.
- **Projects** (2025): Web Developer - Desa Wisata Panembangan Website Fully responsible for the UI design and development of a tourism website using WordPress. Focused on creating a highly mobile-friendly layout, presenting engaging visual content of destinations, and integrating interactive map features to enhance information accessibility and user experience for potential tourists.
- **Projects** (2026): Intelligent Academic Assistant Chatbot (RAG System) Developed a sophisticated conversational AI platform using Python, Flask, and the Retrieval-Augmented Generation (RAG) architecture. Integrated LlamaIndex, Groq LLMs, and HuggingFace embeddings to provide highly accurate, context-aware answers based strictly on official university documents. Engineered a robust SQLite backend with WebSockets to handle real-time messaging and automate administrative workflows, including academic transcript and active student certificate (SKAK) requests.
- **Projects** (2026): Real-Time AI Object Detection App Developed a cross-platform mobile application using Flutter and Dart that performs real-time object detection. Successfully integrated a TensorFlow Lite machine learning model to accurately detect and count objects (e.g., humans/fish) directly via the device's camera. Optimized the image processing pipelines and utilized Provider for state management to ensure smooth, lag-free AI inference on mobile devices.
- **Soft Skills**: Analytical & Problem Solving
  Fast Learner & Adaptability
  Team Collaboration
  Project & Time Management

Client Communication

- **Hard Skills**: Content Management System (CMS): WordPress .
  Web Design & Page Builders: Elementor, UI/UX Design Principles, Landing Page Creation .
  Front-End Development (Dasar): HTML, Cascading Style Sheets (CSS) .
  Web Optimization: Responsive / Mobile-First Web Design, Integrations & Tools: Google Maps API Integration, WhatsApp Form Integration, cPanel / Web Hosting Management .
